## Profile

---

Self-motivated Java Backend Developer with extensive coding experience. Proficient in data structure and algorithm problem-solving. Committed to creating impactful and scalable products. Enthusiastic about staying updated with emerging technologies such as Generative AI to deliver innovative solutions.

## Experience

---

### IHX Private Limited

September 2023 – June 2024

*Associate Software Engineer*

*Bangalore, India*

- Developed and maintained scalable healthcare software using JavaScript, Java, MySQL, MongoDB and FHIR to enhance data interoperability.
- Leveraged RPA technology to automate payer processes, achieving a 30-40% reduction in costs and 80-90% success rate, minimizing manual intervention.
- Created a specialized tool to convert complex JSON data into manageable FHIR objects, improving operational efficiency by 60%.
- Implemented error rectification procedures to ensure seamless operations in healthcare data management.
- Simplified data management processes to enhance operational efficiency and reduce errors in healthcare systems.

## Skills

---

**Languages:** Java, Python, JavaScript

**Web Technologies:** HTML, CSS, RESTful API

**Frameworks:** Spring Boot, Hibernate

**Databases:** MySQL, MongoDB

**Tools:** Maven, Docker, Git, JDBC

**Soft Skills:** Collaboration, Enthusiastic, Innovative

## Projects

---

### Shopzilla

An innovative online shopping platform aimed at enhancing the buying and selling experience.

**Technologies Used:** Java, MySQL, Maven, JDBC, Swing, Git & GitHub

- Smooth Navigation: Ensured a user-friendly and intuitive platform.
- Secure Access: Implemented a safe login and logout process.
- Activity Monitoring: Developed systems to monitor and analyze buying and selling activities.
- Effortless Transactions: Facilitated seamless buying and selling experiences.

### WorkFolio

A sophisticated Java web application for efficient employee data management with a user-friendly interface.

**Technologies Used:** Java, Spring Boot, MySQL, Maven, Spring Data JPA, RESTful API, Thymeleaf, Lombok, Postman

- Intuitive Interface: Facilitates efficient employee data management.
- Seamless MySQL Integration: Enables storage and management of data.
- Accurate Input Validation: Ensures error-free data entry.
- Robust Spring Security: Implements authentication and authorization.

## Education

---

### Masai School, Bengaluru

2022 – 2023

*Full Stack Web Development*

### Devi Ahilya Vishwavidyalaya, Indore

2019 – 2022

*Bachelor of Commerce*

## Certifications

---

Zoom Marathon Challenge: 26-day event where participants create daily 3 to 5-minute videos on various topics to test their content creation skills and commitment.

HackerRank Achievements: Demonstrated strong problem-solving skills in various coding challenges.
