Professional Summary

Java Backend Engineer with 3+ years of experience building high-throughput microservices and event-driven payment systems. Cut payment API latency by 35% and built 3 production microservices from the ground up for onboarding, payments and notifications, including UPI payment integration via M2P. Skilled in Java 17/21, Spring Boot, Apache Kafka, Redis and secure data handling, delivering scalable REST APIs across fintech, enterprise SaaS and healthcare.

Work Experience

MobilePe Fintech Private Limited

Java Backend Engineer

Jun 2026 - Present

Noida, Uttar Pradesh, India

- Architected 3 production microservices (**onboarding-service**, **payment-service** and **notification-service**) from the ground up, forming the platform's core onboarding, payment and notification infrastructure.
- Built UPI registration and wallet system via M2P, including a double-entry balance ledger and hold-then-settle float protection, ensuring accurate and reliable fund transfers in production.
- Built a secure KYC verification pipeline (Aadhaar, PAN and VCIP) with bank-grade encryption (AES-256-GCM) and blind indexing for fast lookups, strengthening fraud prevention during user onboarding.
- Cut payment API latency by 35% by resolving production consumer lag and tuning Kafka consumer concurrency and connection pooling.

AlignBits LLC

Software Engineer (Promoted from Jr. Software Engineer)

Sep 2024 - May 2026

Dubai, UAE (Remote)

- Built Spring Boot microservices with AWS SQS to process asynchronous transactions across 10 enterprise client pipelines.
- Cut manual debugging time by 30% by integrating OpenAI API to automate validation and auto-correction of transformation scripts.
- Engineered an orchestration engine for message routing, payload transformation and split/merge workflows, improving pipeline reliability for enterprise integrations.
- Secured REST API endpoints across 5 microservices using JWT and OAuth 2.0.
- Sped up feature releases by containerizing microservices with Docker and setting up CI/CD pipelines with GitHub Actions.

IHX Private Limited

Associate Software Engineer

Jun 2023 - Aug 2024

Bengaluru, India

- Processed healthcare claims daily by building backend payload transformation engines using Java 11 and MongoDB.
- Lowered response times by 40% by fixing N+1 query loops, adding MySQL indexes and setting up Redis caching.
- Ensured data integrity across medical records by building validation pipelines with Spring Data JPA and custom exception handlers.

Technical Skills

Languages & Core: Java (8/11/17/21), Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Data Structures and Algorithms

Frameworks & Architecture: Spring Boot 3.4+, Spring Security, Spring MVC, Spring Data JPA, Microservices Architecture, Distributed Systems

Databases & Caching: PostgreSQL, MySQL, Redis, MongoDB, Hibernate ORM, Database Query Optimization

APIs & Messaging: RESTful APIs, Apache Kafka, M2P UPI Integration, AWS SQS, RabbitMQ, JWT Authentication, OAuth 2.0, OpenAPI (Swagger)

DevOps & Cloud: AWS (EC2, S3, RDS), Docker, Docker Compose, Git, CI/CD, GitHub Actions, Maven

AI & Automation: OpenAI API, Gemini API, Prompt Engineering, AI Integration

Education

Masai School

Software Engineering Program (Java Backend Specialization)

2022 - 2023

Bengaluru, India

Devi Ahilya Vishwavidyalaya

Bachelor of Commerce (B.Com)

2019 - 2022

Indore, India
